

Scheduling Your Visit

We will be contacting you approximately a month prior to your annual servicing. We will try once by phone, e-mail if you have provided it, and finally a letter when necessary. Please help us by responding to our contact to schedule your visit. You may also contact Dixie at our office, to make special arrangements for times other than when we will be in your area. We do understand that your time is valuable and we will make every effort meet your schedule. You may also schedule your visit on line @www.precisionplumbing.com. Unfortunately if we are unable to schedule with you in a timely fashion and reasonable effort, there will be a small fee of \$59 that will apply.

Of course if you ever experience anything unusual with your home comfort, plumbing or electrical system, give us a call and we will there as soon as we can.

You are given our top priority as an SPP customer.

Your need has precedence over non-member's service calls.

We are only available to SPP members 24 hours a day, and there is never an "overtime" service fee.

As a Service Partner, you will still receive a **15% discount** off of *any plumbing, heating, cooling, and electrical* repairs we provide.

Thank you for your time.

Warmest Regards,

Tom Robichaud
President

What to expect

Plumbing

Heating & Cooling

Electrical
